Jungle Animals

Jungle animals move in their own unique ways. From pouncing, slithering, swinging to crawling, stomping and gliding. We are going to explore how different jungle animals move in their natural habitat!

Use the animal cards in this pack to inspire your improvisation. You can work through each animal as a group or all have your own favourite animal to explore how they move. You could put all of the animals in a bag and make it a lucky dip, taking turns to pick out a new animal for everyone to move like!

Have Fun!
